PROFILE SUMMARY

I analyse player and team performance to produce structured, role-specific scouting reports. My work combines sports science principles with tactical understanding to support recruitment and performance decisions.

SCOUTING FOCUS

- Player evaluation with role-specific profiling
- Tactical and opposition analysis using structured frameworks
- Recruitment profiling aligned with team model and game context
- Clear performance communication for coaching staff

KEY STRENGTHS

- Talent identification & player profiling
- Tactical analysis & match breakdown
- Data-informed decision making
- Communication of performance insights
- Football analytics & scouting frameworks

SELECTED REPORTS

Birmingham U18s vs Crystal Palace U18s View report

Full match analysis including tactical structure, key patterns, and role-specific player evaluations with actionable recommendations.

Derby County Women vs Sporting Khalsa Women View report

Live first-team scouting report with full 11-player evaluation, focusing on individual performance, technical ability, physical profile, and decision-making.

Liverpool Opposition Report View report

Opposition-focused analysis examining tactical structure, in-possession patterns, out-of-possession behaviour, and potential match risks.

Valentin Barco Three-Match Report View report

Multi-match player assessment exploring role suitability, tactical impact, technical profile, and key decision-making tendencies.

PRODUCT WORK

Founder, SquadIQ View SquadIQ

Designed and developed a football analysis platform enabling managers to track squad performance, analyse players, and improve decision-making through structured data and match insights.
